Viewing Network Details

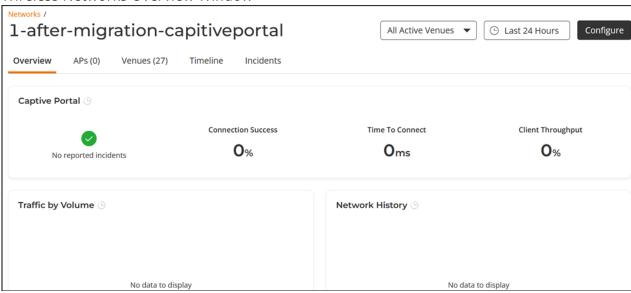

You can view more information about a network, including a summary of its settings, a diversity chart of its wireless clients, and the volume of the wireless traffic that it has handled.

Complete the following steps to view detailed information about a network.

- 1. From the navigation pane, click Wi-Fi > (and then)Wi-Fi Networks List.

 The Wireless Networks window displays a list of networks that you previously created.
- 2. Click the name of the network for which you want to view detailed information. The Overview tab of the network information window is displayed.
